

Disclosure is made regarding the questions asked in Ordinary General Assembly of Pinar Entegre Et ve Un Sanayii A.Ş. dated 28.03.2019.

Question: I have been a shareholder of the Company for 35 year roughly and We do not make money from the Company. How will this work? I did not get any dividend last year.

Answer: We are one of the companies that distributes profit constantly, as we did last year. The dividend distribution ratio is 80% as of recent year. In other words, 800 TL dividend is paid for 1000 TL nominal shares. When you look at the last 5, 6, 10 years, Pinar Et is one of the publicly held corporations that distributes profit steadily. As you know Borsa İstanbul has been switched to the dematerialization system. Dividends are transferred to the related accounts by the dematerialization system. We kindly requested you check your accounts. The amount of the profit is quite good in recent conditions.
